EXPERIENCE

Spinny

SDE-II

Gurgaon

Jan 2025 – Present

- **Developed** the **Spinny Pro** website for desktop single-handedly, enabling seamless service booking and management. Led to increase overall user visit by 8-9%
- **Built** the **Adhoc Approval** Flow in Spinny Care, enabling technicians to send car parts issue approvals to users via the app, **cutting turnaround time by 20-25%** and manual intervention
- **Constructed** the **Payment checkout** for the Spinny Care website, reducing cash transactions and 100% digital record-keeping and refund processes.
- **Built** an intuitive, **SEO-optimized Car Service Cost Calculator** that allows users to estimate service charges based on vehicle type and ranks on the **1st page** of Google search.
- **Integrated and enhanced the shared Design System** for the Spinny Consumer platform, contributing reusable components and standardizing UI patterns, reducing development effort and improving product consistency.
- **Developed the Catalogue Page** from scratch to display spare parts availability for refurbishment cars, **using tanStack Query**. Impact: Page Load faster, API takes less time, More convenient UI.
- Developed the **Sell Homepage** for the Spinny Consumer website from scratch, redesigning the user journey with a simpler and more intuitive UI, resulting in a **10% increase in lead conversion rates**.
- Revamped the React codebase by eliminating unnecessary re-renders, applying **useMemo, useCallback, dynamic imports, and virtualization**, enhancing **CLS, FPS, and LCP metrics**, and increasing page performance and load speed by **20-30%**.
- Integrated **Webview** in the Spinny app, and solved a lot of navigation related bugs.

Airtel

Software Engineer

Gurgaon

Oct 2023 – Jan 2025

- **Developed Airtel UPI onboarding**, improving success rates (SR) by 2%, and created health callouts for down banks, leading to a **1.5% SR boost**.
- Built backend-driven widgets for **APB wallet** and **saved-cards (credit/debit)** payment modes, integrating encryption for card transactions and MPIN validation, improving security and user experience. Impact: Wallet has almost **100%** SR (success rate of transaction).
- Built **SIM binding check** for APB wallet transaction. This led to a reduction in APB wallet fraud cases and increased account security. Positive impact on SR by **1%**.
- **Architected** a scalable, new payment checkout flow in React Native, handling all edge cases. MAU: **3 million**.
- Worked on Airtel's **payment web repository**, developing the **Airtel UPI payment flow** with seamless VPA handling and intent/callback integration, enhancing reliability and user experience across platforms.
